

Mr. Ali Mohammad Nekoh  
Group no: 6  
Email: ali.nekoh@stud.fra-uas.de

Matriculation Number: 1444966  
Project: 3

### Accomplishments after 3rd Report:

I have installed and tested Prometheus on Windows OS with WMI **Exporter** which is an open-source exporter for Windows Servers that exports metrics such as CPU usage, memory, and disk I/O usage. It can also be used to monitor IIS sites and applications, network interfaces, services, and local temperature.

### Goals for the Next Week:

- Cooperating with other group members
- Preparing the final presentation and project report

### Anticipated Obstacles:

- There is not any problem yet but need more work to prepare the final writing.

**Conclusion:** Progress is on good track, and I'm excited to continue exploring the applications of Monitoring and Migration in cloud computing. Looking forward to discussing this in our next meeting.
